

MOYOPAY 10-WEEK PRELAUNCH: PHASE 2

EXECUTION MASTERPLAN

Private Alpha Testing, Pioneer Advocate Rollout, Trust Validation & Viral Referral Engine (Weeks 5 to 8)

OPERATIONAL MANDATE & SPRINT OBJECTIVE

To the Growth Team, Community Architect, Copywriter, and Campaign Operators: Phase 1 established the activating umbrella story: "Your salary is losing a race you never signed up for."

Phase 2 (Weeks 5 to 8) is where narrative converts into commercial momentum. Our dual objectives are: 1. Scale the verified waitlist from 1,400 to our 5,000-subscriber trigger threshold through organic viral loops, high-signal reply engagement, and a precision \$30 retargeting experiment. 2. Transform passive email subscribers into an activated **Pioneer Advocate Base** by running a closed Private Alpha testing cohort, proving regulatory legitimacy, and launching our gamified milestone referral leaderboard.

Every script, email, ad variant, and social thread in this document is written to the **Stephycopy Standard**: Zero em dashes, zero AI buzzwords, affirmative world-building, single-line verdicts, and authentic Nigerian financial reality.

1. SPRINT ARCHITECTURE & WEEK-BY-WEEK OPERATIONAL MILESTONES

2. WORKSTREAM 1: THE 1.4K DORMANT WAITLIST REACTIVATION CAMPAIGN

The 1,400 individuals already on the waitlist are our warmest asset, but their intent decays every week we stay silent. We do not send a boring newsletter update. We awaken them by giving them an elite identity: **The Founding Pioneers**.

Reactivation Email 1: The Pioneer Identity & Batch Allocation

- **Send Day:** Week 5, Tuesday at 10:00 AM WAT.
- **Target Audience:** All 1,400 existing waitlist subscribers.
- **Objective:** Re-ignite excitement, confirm their primary inbox placement, and give them their verified Pioneer status.

Subject: pioneer #0001: your dollar wallet position is confirmed

Preview Text: You joined early. Here is what we built for you while we were quiet.

Good morning,

You joined the Moyopay waitlist when this was still a quiet blueprint on a whiteboard.

Most people wait for an app to launch, watch other people use it for six months, and then sign up after everyone

You did not do that. You moved early.

Because you signed up before our public campaign, your account has been assigned verified Founding Pioneer status

Here is what that means in plain English:

1. Priority Day-1 access: While the general public waits in tiered batches on launch morning, your wallet activates first.
2. Permanent zero maintenance fees: Your digital dollar account will never carry subscription deductions or dormant fees.
3. Alpha testing eligibility: Later this week, we are selecting 100 Pioneers to test our live payment rails with

Over the past four months, the naira lost another leg of its purchasing power.

Every freelancer who got paid through traditional wire transfer watched correspondent banks take \$45 and wait five

We built Moyopay to end that circus.

A real digital dollar wallet on your phone. Non-custodial security. Direct settlement in 14 seconds. Zero bank queue

We are entering the final testing stretch. Over the next four weeks, you will see inside the engine: our regulatory

Do one thing for me right now:

Reply to this email with one word: "Ready".

Replying tells your email provider that we are real human beings, so our private Alpha invitation and launch access

Let us build this.

Stephen Agbede
Product Strategy, Moyopay

P.S. We just verified Pioneer #1420. If you have a friend whose salary is bleeding to inflation every single month

Reactivation Email 2: The 14-Second Settlement Proof Teardown

- **Send Day:** Week 6, Thursday at 2:00 PM WAT.
- **Target Audience:** Full waitlist.

- **Objective:** Build mechanistic belief by contrasting the traditional correspondent banking wire with Moyopay's digital dollar rail.

Subject: under the hood: how 14 seconds actually happens

Preview Text: Why traditional banks take 4 days, and why we do not.

Good afternoon,

When you send \$500 from New York to Lagos through a traditional commercial bank, your money does not fly across the

It is just numbers on a computer screen.

Why does it take four business days?

Because your money has to pass through what the financial industry calls Correspondent Banking:

1. Your client's local bank in Chicago passes the money to an intermediary bank in New York.
2. The New York bank clips a \$25 processing fee and holds the money for compliance review.
3. The New York bank transfers the wire to a correspondent partner bank in London.
4. The London bank clips another \$20 fee and waits for morning clearance.
5. The London bank finally wires the money to your commercial bank in Lagos.
6. Your bank in Lagos applies a hidden 6% currency conversion markup and tells you to bring a physical paper invoice

Four days lost. \$45 stolen in fees. An exchange rate that makes you want to close your eyes.

This is not a technical delay. It is an organized tollbooth.

Here is how Moyopay does the exact same transaction in 14 seconds:

Your client funds your invoice using their regular debit card, Apple Pay, or direct US ACH bank transfer.

Our engine instantly converts the payment into fully backed, dollar-pegged stablecoins on high-velocity settlement

The transaction confirms on-chain in 800 milliseconds.

Our licensed local partner network settles the funds directly into your Moyopay digital dollar wallet or your local

Total time elapsed: 14 seconds.

Total intermediary wire fees: Zero.

Bureaucracy endured: Zero.

The technology to make money move as fast as a WhatsApp message has existed for years.

Legacy banks just had no commercial incentive to give it to you, because your delays are their quarterly profit.

We built Moyopay because we were tired of waiting for permission to spend our own money.

Private Alpha invitations go out to our first 100 Pioneers on Monday. Keep your eyes on this inbox.

Stephen Agbede

Moyopay

P.S. Yes, your dollars inside Moyopay are backed 1:1 by liquid cash reserves and US Treasury bills. In our next n

3. WORKSTREAM 2: THE PRIVATE ALPHA COHORT TESTING ARCHITECTURE (100 SELECTED USERS)

The Private Alpha is not a ceremonial software preview. It is our engine for generating **irrefutable social proof, transaction receipts, and visceral user testimonials** while stress-testing our settlement bridges.

Alpha Selection Criteria & Cohort Split

To qualify for the 100-person Alpha: 1. Must have signed up within the first 1,500 waitlist positions. 2. Must actively execute at least two cross-border or foreign currency transactions monthly (\$200+ volume). 3. Must agree to complete three functional test drills over seven days and provide screen recordings or unedited feedback.

Alpha Invitation & Onboarding Protocol

- Channel:** Direct personal email from the Lead Strategist + Private SMS notification.

Subject: pioneer #0042: you are selected for the private alpha

Preview Text: Download link and credentials inside. Strict 100-user cap.

Pioneer,

Out of 1,800+ waitlist applicants, your profile was selected for Cohort 01 of the Moyopay Private Alpha.

Starting today, you have direct access to our live development build on iOS TestFlight and Android APK.

Here are your onboarding credentials:

- Test Flight / APK Access: <https://moyopay.io/alpha-download?token=ALPHA-8842-PIIONEER>
- Dedicated Tester ID: ALPHA-0042
- Private War Room Telegram: <https://t.me/+MoyopayAlphaWarRoom>

Your Three Testing Drills Over the Next 7 Days:

Drill 1 (Day 1): Create your account, complete frictionless biometric verification, and generate your personal US

Drill 2 (Day 3): Fund your wallet with a test deposit of \$10 to \$50, convert between digital dollars and local cu

Drill 3 (Day 5): Issue a Moyopay Virtual Dollar Card, link it to your Apple/Google Pay or Spotify/Netflix account

If anything feels slow, confusing, or clunky, do not be polite.

Drop the screenshot directly in the Telegram War Room. We are building this for daily operational survival, and y

Welcome to the vanguard.

Stephen Agbede
Product Strategy, Moyopay

The Friction & Bug Reporting Loop (Telegram War Room)

The Telegram War Room is moderated live by the product lead and technical engineering team. * **Operating Hours:** 8:00 AM to 11:00 PM WAT. * **Response SLA:** Under 15 minutes for any transaction-related friction report. * **Bug Bounty Reward:** Any user who identifies a reproducible transaction UI flaw or latency delay receives **\$25 credited directly to their live Moyopay dollar wallet.**

Alpha Graduation & Testimonial Extraction Prompt

On Day 7 of the Alpha, when the user completes their final drill, send this automated prompt in the Telegram channel:

Alpha Pioneers, quick checkpoint:

Do not give us a polite corporate review. Answer these two questions directly:

1. "What was the exact moment in the app where you sighed with relief?"
2. "How did paying with your Moyopay card compare to the last time your traditional bank card declined?"

Drop your raw answer below, or send a quick 20-second voice note.

Every response is screenshotted, anonymized (or tagged with permission), and converted into our Workstream 5 social proof assets.

4. WORKSTREAM 3: THE TRUST & REGULATORY LEGITIMACY CAMPAIGN

In Nigeria and broader Africa, financial cynicism is high. Every consumer has been burned by crypto pyramid schemes, frozen fintech accounts, or sudden regulatory crackdowns.

If we only talk about "fast transactions" and "digital dollars", market defense mechanisms trigger immediately:

"Is this another unregulated crypto startup that will vanish with my savings?"

We address this objection head-on in Week 6 with uncompromising institutional transparency.

The 3 Structural Pillars of Legitimacy

Public Legitimacy Carousel Script (Instagram & LinkedIn)

- **Visual Format:** 6-Slide High-Contrast Minimalist Carousel (Deep Forest Green #06261A , Crisp Bone White #F9F9F6 , Electric Mint #00D084).

Slide 1: The Hook

- **Large Bold Headline:** Is Moyopay just crypto in a trench coat?

- **Subhead:** A completely honest answer about who holds your money, who regulates our rails, and why we do not gamble with your sweat.
- **Visual:** Clean typographical layout. No cartoon graphics.

Slide 2: The Core Problem With 'Unregulated Apps'

- **Headline:** You have every right to be suspicious.
- **Body Copy:** Over the last four years, thousands of hardworking professionals lost savings to unregulated crypto platforms that promised 25% unrealistic yields, hid their founders behind cartoon avatars, and operated without licensed banking rails. When they collapsed, customer support went dark. We did not build Moyopay to play casino games with your financial stability.

Slide 3: How Your Dollars Are Held

- **Headline:** 1:1 Reserves. Zero Speculation.
- **Body Copy:** Moyopay is a digital dollar wallet, not an exchange for trading speculative meme tokens. Every dollar balance on your phone is backed 1:1 by liquid cash reserves and short-dated US Treasury bills managed by institutional US custodians. We do not lend out your money. We do not engage in speculative yield farming. Your dollars remain dollars.

Slide 4: The Nigerian Settlement Bridge

- **Headline:** How Your Naira Moves.
- **Body Copy:** When you fund your account in Naira or withdraw your earnings to your local commercial bank, your transaction flows exclusively through Central Bank of Nigeria (CBN) licensed settlement partners. Zero shadow accounts. Zero risky P2P bank transfers that risk account freezes. Clean, compliant, and transparent.

Slide 5: The Global Card Infrastructure

- **Headline:** Accepted Everywhere Visa and Mastercard Work.
- **Body Copy:** Moyopay virtual cards are issued in direct partnership with regulated international card payment networks. Pay for your AWS server bills, Apple subscriptions, Coursera fees, and Google Workspace without arbitrary \$20 monthly limits or embarrassing checkout declines.

Slide 6: The Verdict & Call to Action

- **Headline:** High speed requires deep roots.
- **Body Copy:** We built Moyopay so you never have to choose between modern speed and institutional safety again. The Founding Pioneer waitlist closes at 5,000 verified members.
- **Call to Action:** Join the waitlist at moyopay.io.

5. WORKSTREAM 4: THE PIONEER REFERRAL & GAMIFIED LEADERBOARD ENGINE

Generic prelaunch referral requests ("*Share this with your friends!*") produce zero results because they ask for social capital without providing status or tangible utility.

We install the **Pioneer Milestone Unlock System**: clear, desirable, tier-based status rewards.

The 3-Tier Milestone Unlock Architecture

TIER LEVEL	REFERRALS REQUIRED	OPERATIONAL REWARD	PSYCHOLOGICAL BENEFIT
Tier 1: Card Priority	**3 Verified Signups**	Immediate priority issuance of the Moyopay Virtual Dollar Card	Immediate priority issuance of the Moyopay Virtual Dollar Card
Tier 2: Fee Holiday	**5 Verified Signups**	90 days of completely zero-fee cross-border settlements and	90 days of completely zero-fee cross-border settlements and

In-App / Web Dashboard Referral Microcopy Strings

- **Main Counter Title:** Your Pioneer Rank: #0042 of 3,840
- **Progress Bar Subtext:** 2 more referrals needed to unlock 90 Days of Zero-Fee Transactions.
- **One-Click Share Button:** Copy My Pioneer Link
- **WhatsApp Share String:** I just claimed my Founding Pioneer access on Moyopay to get a digital dollar wallet that settles in 14 seconds. Skip the general launch queue using my personal link: [LINK]
- **X Share String:** Tired of watching local inflation destroy your salary. I just joined the @MoyopayHQ Pioneer cohort for instant digital dollar settlements. Claim your spot before the 5k cap: [LINK]

6. WORKSTREAM 5: THE UGC NARRATIVE WOUND CAMPAIGN

The most potent marketing for Moyopay is not our corporate copy. It is the unvarnished, painful financial experiences of our users shared publicly.

The 'What Did Naira Cost You?' Prompt Engineering

In Week 7, we launch a coordinated organic engagement prompt across X and Telegram.

The Seed Prompt (Posted from Founder and Core Team Accounts):

*"A quick question for Nigerian freelancers, agency founders, and remote workers:
What is the single most painful or absurd thing the naira depreciation and traditional bank limits cost your business this year?
Do not give vague answers. Give the exact numbers and the story."*

Why This Prompt Works:

1. It does not ask for an artificial endorsement of a product they have not fully used.
2. It gives people permission to vent about a shared, real emotional trauma.
3. It generates high-engagement quote-tweets and replies that trigger algorithmic amplification on X.

The 'Receipts' Visual Social Proof Engine

When users reply with harrowing stories, our social design team immediately transforms them into **"Receipts Cards"**: *

Card Format: High-contrast screenshot format featuring the user's real quote, avatar, and an objective calculation of the financial loss under the legacy banking system versus the Moyopay alternative.

```

Ad Creative 1: The 'Losing Race' Salary Agitation

- **Visual:** Clean split-screen photograph. Left side: A stack of paper Naira notes fading into dust. Right side: A crisp, black smartphone displaying a glowing green Moyopay digital dollar balance (\$2,450.00).
- **Headline:** Stop losing to a currency you can opt out of.
- **Primary Text:** If your income sits in a conventional bank account, you work 40 hours a week just to watch local inflation steal your purchasing power by the weekend.

Moyopay gives you an instant digital dollar wallet directly on your smartphone.

Hold your funds in digital dollars backed 1:1 by liquid cash reserves. Convert to local currency in 14 seconds when you actually need to spend. Zero bank queues. Zero paperwork.

The Founding Pioneer waitlist closes at 5,000 members. * **CTA Button:** Sign Up (Direct link to <https://moyopay.io>).

Ad Creative 2: The 'Card Decline at Checkout' Friction Killer

- **Visual:** A realistic screenshot of a red e-commerce checkout notification: "*Transaction Failed: Card issuer declined international payment*", overlaid with a sleek green Moyopay Virtual Mastercard and a bold stamp: "**DECLINES END HERE**".
- **Headline:** The virtual dollar card that actually works.
- **Primary Text:** Nothing is more frustrating than needing to pay for AWS, Figma, or Google Workspace for your business, only to watch your Nigerian commercial bank card decline for the fourth time.

Moyopay virtual dollar cards are issued through regulated international payment networks.

Fund directly with local rails. Pay international software vendors instantly. No monthly \$20 spending limits.

Join 3,500+ professionals on the early access waitlist. * **CTA Button:** Get Early Access.

Ad Creative 3: The '14-Second Global Settlement' Mechanism

- **Visual:** A screen recording loop of an invoice being generated, paid in New York, and arriving in a Lagos wallet with a green checkmark reading: "Settled in 14.2s • Fee: \$0.00".
- **Headline:** How international payments should work in 2026.
- **Primary Text:** Traditional international wires take 4 business days and lose \$45 to intermediary correspondent banks.

Moyopay settles global client payments across high-speed stablecoin infrastructure in 14 seconds flat.

Keep your earnings in real hard currency. Spend locally whenever you choose.

Pioneer access is filling rapidly. Secure your spot before launch day. * **CTA Button:** Join the Waitlist.

8. WORKSTREAM 7: FOUNDER NARRATIVE & ORGANIC VIRALITY ENGINE

Organic virality is not a lottery. It is the deliberate application of sharp cultural commentary to real-world financial events.

SOP: The 90-Minute Currency News-Jacking Reaction

Whenever the Central Bank releases a new foreign exchange circular, or the Naira hits a new exchange rate threshold: 1. **Minute 0 to 20:** The lead strategist reads the circular and extracts the single hidden friction point for ordinary earners. 2. **Minute 21 to 50:** Draft a 6-to-8 tweet reaction thread following the **Context** → **Mechanism** → **Consequence** → **Alternative** structure. 3. **Minute 51 to 70:** Executive review and founder sign-off. 4. **Minute 71 to 90:** Publish on X, deploy initial quote-tweets, and cross-post summary to LinkedIn.

Founder Thread 1 (X): The Anatomy of a ₦1,650 Exchange Rate

- **Author:** Founder Account.

1/ If you earned ₦1,000,000 a month in 2021, you took home roughly \$2,000.

Today, if you earn that exact same ₦1,000,000, you take home roughly \$600.

You did not get lazier. You did not work fewer hours. You did not lose your skills.

Your local currency simply lost a race against global reality. Here is why holding Naira savings in 2026 is an ac

2/ When you leave your money inside a traditional commercial bank account, three silent deductions happen simulta

First: Domestic inflation destroys 30%+ of your grocery purchasing power every twelve months.

Second: Local currency devaluation makes imported electronics, software, and fuel more expensive by the week.

Third: Your bank charges you account maintenance fees, card fees, and transfer levies for the privilege of watchi

3/ The traditional answer has always been: "Go buy physical US dollars from a Bureau de Change dealer in Ikeja or

What happens when you try that?

- You pay an exorbitant cash markup.
- You risk counterfeit notes.
- You have to hide physical paper notes under a mattress because local banks make depositing cash a bureaucratic

4/ The modern answer is not physical paper cash. It is digital dollar infrastructure.

A digital dollar backed 1:1 by short-dated US Treasury bills and cash reserves, held directly on your mobile devi

5/ When a client in the United States or Europe pays you:

The money should not pass through four correspondent banks in London and New York.

It should not take 96 hours to clear.

It should not lose 6% to an arbitrary conversion spread.

It should settle directly on high-speed rails in 14 seconds.

6/ That is why we are building @MoyopayHQ.

Not to launch another speculative crypto platform.

To build an indestructible financial bridge for African professionals who refuse to watch their sweat get wiped o

7/ We just crossed 3,000 verified members on our early access waitlist.

Our first 100 Pioneers are testing live transactions in our Private Alpha right now.

👉 <https://moyopay.io>

Founder Thread 2 (X): Why African Banks Clip 7% on Hidden Spreads

- **Author:** Founder Account.

1/ A banking secret that costs African remote workers millions of dollars every month:

The fee your bank advertises is almost never the fee you actually pay.

Here is the exact math of how traditional international transfers quietly rob you of 7% of your revenue: 🕒

2/ Suppose an overseas client wires you \$1,000.

Your bank statement shows a transparent transfer fee of "\$15".

You think: "That is reasonable."

What you do not see is the hidden spread.

3/ The true market exchange rate on the open market might be ₦1,620 per dollar.

Your commercial bank processes your inbound wire at ₦1,510 per dollar.

That difference of ₦110 per dollar is not a technical cost.

It is pure, unadulterated profit for the bank's foreign exchange trading desk.

4/ On a \$1,000 transfer, that hidden spread costs you ₦110,000.

Add the \$15 upfront wire fee, plus the \$25 correspondent bank intermediary deduction.

Total cost to receive your own salary: Over ₦150,000 (\$90+).

Almost 10% of your labor vanished into bank paperwork.

5/ In 2026, there is zero technical justification for this.

Stablecoin settlement rails settle transactions for fractions of a single cent in less than two seconds.

When you remove the bloated correspondent banking layers, you can settle cross-border money at the true market rate.

6/ That is our commitment at @MoyopayHQ:

- Transparent market rates.
- Direct digital dollar deposits.
- Complete control over when and how you convert.

Stop paying a 7% tollbooth on your hard-earned sweat.
